To whom it may concern,

I write to confirm the participation of Magnus Ögren in the Siemens Science Experience (January 2008) and the Experience Science program (July 2009) at the University of Queensland. For each of these events, we ran 6 workshops on “Einstein, quantum physics, and the coolest stuff in the Universe” for senior school students. Magnus’s contribution, which was entirely voluntary, was crucial to the success of these workshops to educate and inspire school students about the cutting edge of scientific research.

Yours sincerely,

Joel Corney
